

HiMON[®]

MONITORING SYSTEM FOR CABLES AND OVERHEADLINES

Online cable fault localization, partial discharge measurement

KEY ADVANTAGES

- Easy temporary or permanent installation
- Highest measurement sensitivity
- Automatic analysis and intuitive operation
- Monitoring of cable sections and joints

HiMON® Red

APPLICATION

- Fast localization of cable breakdowns
- Supervision of critical cable infrastructure up to 3,000 km

HiMAG®

HiRES® Locator

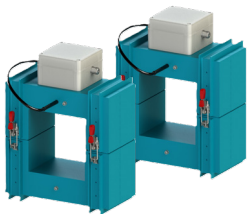

HiMON® Expert System

HiMON® Blue

APPLICATION

- Evaluation of small-scale signals, e.g. partial discharges
- Temporary and continuous cable inspection for HV and MV cables up to 12 km

2 x HiMAG® 175

2 x HiMAG® 100

HiRES® Analyzer

HiMON® Expert System

HiMON® Black

APPLICATION

- Inspection and monitoring of dedicated metallic return (DMR) cables

2 x HiMAG®

HiRES® Injection Unit
